

COURSE DETAILS

Course host: Fairfield Police Department

Location: 5230 Pleasant Ave.
Fairfield, OH 45015

Dates: June 25-26, 2018 8:00 AM – 5:00 PM

Cost: \$395.00

TARGET AUDIENCE

Case detectives, investigators, and officers who review and use video as part of criminal investigations.

COURSE HIGHLIGHTS

Designed for case detectives and investigators with little to no digital video training. This course will give insight into how digital video works and provide skills to quickly and effectively use video footage as part of a successful criminal investigation.

Students must provide their own laptop (PC or Mac) as open source and free software programs will be introduced for download and use.

SPECIFIC OBJECTIVES

- What is a digital video file and how can I get the most from the imagery?
- How to play almost any video file with free resources.
- How to maintain file integrity for admissibility in court.
- Tips for effective recovery of digital video.
- Image capture and clarification concepts.
- The work of a Forensic Video Analyst.
- New and emerging video technologies.

INSTRUCTORS

Brandon Epstein is a LEVA certified Forensic Video Analyst and Detective Sergeant with an urban New Jersey police department. He is currently assigned as the department's Digital and Multimedia Evidence Laboratory Director where he specializes in Forensic Video Analysis and Mobile Device Forensics.

Blake Sawyer is a LEVA certified Forensic Video Analyst and a Digital Media Forensics Specialist with the Plano, TX Police Department. He is a former Apple Engineer with a degree in Computer Science and a long history in the digital forensics industry.
